Research Paper: Electric Vehicles and the Future of the Auto Shop

More and more customers are driving electric vehicles. In this paper you will research how an EV works and what that means for the work technicians do in a repair shop.

Requirements

Write a paper of **800 to 1,000 words** (not counting the title page, table of contents and references). Use this structure:

- Title page and table of contents
- Introduction
- Part 1: How does an EV drivetrain work? Cover at least the high-voltage battery, the inverter, the electric motor and regenerative braking.
- Part 2: Working safely on high voltage. What are the dangers, and what steps does a technician follow before working on an EV?
- Part 3: What changes for the repair shop? What maintenance goes away and what stays?
- Conclusion with your own opinion: would you want to work at a shop that specializes in EVs? Why or why not?
- References (at least 3 sources, APA format)

Grading rubric

Criterion	Points
Technical content is correct and complete	10
Follows the required structure	4
Opinion is clearly supported	3
Writing mechanics (spelling, grammar, clarity)	3
Sources cited correctly in APA	2

Submit as a Word file named EV_Paper_FirstName_LastName.docx
